

ECOBBOX

for the sustainable recycling of acrylic and polycarbonate scrap

Recycling has never been so easy

We recycle your acrylic (PMMA) and polycarbonate (PC) scrap, because true sustainability and circular economy are important to us. With the ECOBOX, we close the loop by recycling your collected acrylic or polycarbonate waste and producing the recycling raw material RECYKLATE from it. Our customers produce new sustainable products from the recycled material, such as sheets, lamps or sockets.

Be part of the ECOBOX

Simply order the ECOBOXES online, fill them with acrylic glass or polycarbonate scrap and have them collected again free of charge from us. On request, we will send you new ECO-BOXES again and exchange them when we collect the full boxes.

The cost per box:	10 € per month (First month: 25 €)
Transport costs:	0,00 €
Disposal costs:	0,00 €

If you regularly need to collect large quantities of acrylic glass or polycarbonate scrap, we will be happy to make you an individual offer, with comprehensive services and an interesting remuneration.

What should you pay attention for?

Separation according to type

Only pure acrylic glass or pure polycarbonate in any shape and color but without foreign substances and other waste may be collected in the ECOBOX. A correctly sorted collection is very important: acrylic to acrylic and PC to PC. If you are unsure, please contact us.

Quantity

In order to ensure cost-effectiveness and sustainability, please fill the ECOBOXES completely.

Loading

Please stack the full boxes on top of each other when loaded onto the truck. You may need a forklift or a pallet stacker for this.

What is allowed in the ECOBOX for acrylic glass?

Acrylic glass of all brands, offcuts, XT, GS, resist, hard-coated, colorless, white, colored, printed, with foil, without foil, corrugated sheets, multiwall sheets, solid sheets, tubes and rods, old acrylic after use, displays, advertising signs, room dividers, hygiene protection screens, roofing sheets etc.

What is not allowed: shavings, metal, other plastics, other waste

What is allowed in the ECOBOX for polycarbonate?

Polycarbonate of all brands, sheet rests, offcuts, with or without foil, colorless, white, colored, printed, corrugated sheets, multiwall sheets, solid sheets, displays, room dividers, hygiene protection screens, waste material after use (however not soiled or weathered).

What is not allowed: shavings, metal, other plastics, other waste
